Education, Training and Positions

Business or Sector: Academic

- Current** Full Professor in Molecular Biology, University of Naples Federico II, since 2011
2023-present National Scientific Habilitation 2023-2025, Italian National Agency for the Evaluation of Universities and Research Institutes, Member of the Panel SC 05/E2, Molecular Biology
2023-present Member of the Directive Board, PharmaTech Academy, Università degli Studi di Napoli Federico II
2020-present Dean, Bachelor's Program in Biotechnology for Health, Università degli Studi di Napoli Federico II
2019-present Principal Investigator, CEINGE Biotecnologie Avanzate Franco Salvatore, Naples, Italy
2019-2021 Deputy Director, Dipartimento di Medicina molecolare e Biotecnologie mediche, Università degli Studi di Napoli Federico II
2002-2010: Associate Professor in Molecular Biology, University of Naples Federico II
1996-2002: Assistant Professor in Biochemistry, University of Naples Federico II
1997 Visiting scientist, Gene expression programme, EMBL Heidelberg, Germany (Dr. Hans Schoeler).
1996: PhD in Biotechnologies, University of L'Aquila.
1991-1994 Visiting fellow, Laboratory of Cell Biology, National Cancer Institute, National Institutes of Health, Bethesda, MD, U.S.A. (Dr. E. Appella).
1988: State examination in Biology
1987: M.Sc. Degree in Biological Sciences magna cum laude, Università degli Studi di Napoli

Awards

- 1997: Short-term Fellowship by the Fondazione Italiana per la Ricerca sul Cancro (F.I.R.C.), for a 3-month stay at the European Molecular Biology Laboratory, Heidelberg, Germany.
1993-1994 "Fogarty" Fellowship, National Cancer Institute, National Institutes of Health, Bethesda, MD, USA
1991-1993 "Fogarty" Fellowship, National Cancer Institute, National Institutes of Health, Bethesda, MD, USA
1989-1991. Fellowship by the Italian Association for Cancer Research (A.I.R.C.)

Funding

Scientific activity

As a fellow of the Italian Association for Cancer Research, between 1989 and 1991, he worked on regulation of gene expression. From 1991 to 1994, at the National Cancer Institute in Bethesda, MD, USA, he was a visiting fellow, working on structure-function relationship of the p53 tumor suppressor protein, and on the HIVI nucleocapsid protein. During 1997, at the European Molecular Biology Laboratory (Heidelberg, Germany), he spent a period to get trained on gene targeting in the mouse. Since 1994, at the Department of Biochemistry and Medical Biotechnologies, the University of Naples, he participated to research projects leading to the identification of protein-protein interactions and signal transduction pathways, which contributed to the identification of various molecular complexes involving the Alzheimer's beta-amyloid precursor protein (APP) and the molecular adaptor, Fe65. Next, he studied the signalling mechanisms which regulate the proteolytic processing of APP, and its transcriptional effects, following the nuclear translocation of the Fe65/APP complex. He also generated and analyzed animal models for the functional study of the Fe65/APP system in the mouse and in the nematode *Caenorhabditis elegans*, through reverse genetics approaches. He also characterized molecular and functional characterization of multi-protein complexes and protein expression signatures in hypoxia and cancer. More recently, he

dedicated his scientific activity to the isolation of monoclonal antibodies and setting of antibody-based treatments in cancer and viral diseases, and to the generation of HSV-1 based oncolytic viruses and characterization of mechanisms of oncovirotherapy in preclinical models.
